

# Manil Gajjar | Full-Stack Developer

manilgajjar@gmail.com | +44 79-38-55-98-21 (WhatsApp) | London, UK - Intend to relocate

[linkedin.com/in/manilgajjar](https://www.linkedin.com/in/manilgajjar) | [github.com/puymieyches](https://github.com/puymieyches)

Finance graduate turned developer with hands-on experience in modern technologies, driven by curiosity and passion for problem-solving. Looking to relocate permanently and build a career in Spain.

## CORE SKILLS

- Front-End : JavaScript (ES6+), TypeScript, Vue / Nuxt3, React, HTML5, CSS3 (Sass | Bootstrap)
- Back-End & APIs : Node.js, Express, REST, Passport.js, Socket.io
- Cloud & DevOps : Cloudflare Workers, AWS (AppRunner | S3), Docker (basic), Git/GitHub, Bash, VS Code
- Databases & Storage : PostgreSQL, MongoDB, Mongoose, Cloudflare KV
- Data & Visualization : Python (Pandas, NumPy, Matplotlib), D3.js, Chart.js
- Testing & Quality Assurance : Jest, Mocha/Chai, Chai-http, ESLint/Prettier

## WORK EXPERIENCE

### Odys

Nov 2024 - Apr 2025

*Web Development Intern*

*Remote*

- Developed Nuxt3 (Vue framework) applications, enhancing UI/UX, integrating authentication, API calls to Airtable, and a dynamic query builder, using TypeScript, Basic Auth and Axios, with Vue DevTools for debugging.
- Built and customized SOFTR pages, using custom code with HTML, CSS, JavaScript and SQL for custom queries to PostgreSQL databases, while troubleshooting issues with platform support, and contributing to the SOFTR community.
- Deployed applications using GitHub and AWS AppRunner, implementing cookie fetching, and optimised API requests using server-side caching.
- Created interactive data visualizations using Chart.js, made custom images following templates on Canva, and coded a web scraper to gather content for landing pages.
- Collaborated with the team via Agile tools (Slack & Trello) to manage tasks and improve workflows.

### Freelance

Sep 2022 – Dec 2023

*Business Consultant*

*Remote*

- Solved existing operational problems, updated software, provided new digital solutions and trained management on how to use the programmes improving productivity
- Implemented new billing and payment plans tailored for clients based on an analysis of the company's cash flow and projected revenue streams, improving relations with current clients and providing flexibility for future prospects.
- Maintained and updated the company website, using custom code and WordPress.

## PROJECTS

- Trackmania Discord Bot - Using Cloudflare workers and KV, accesses the Nadeo API to display Trackmania club-member specific campaign stats in a desired Discord channel, including weekly reset timers and weekly shorts.

## EDUCATION

### FreeCodeCamp

Jan 2024 - Jul 2024

*Full Stack Developer Certification*

*Remote*

- 300-hour curriculum: responsive web design, JS algorithms, React, REST APIs, SQL/NoSQL, and Python/Pandas.
- Projects included a personal portfolio, a JavaScript calculator, a Markdown previewer, and a full-stack web application.

### University of Aberdeen

Sep 2015 - June 2019

*Masters of Arts (Hons), Finance and Accounting*

*Aberdeen, Scotland*

- Graduated with Upper Second-Class Honours (2:1)
- Completed accounting, corporate finance, personal finance, statistics, and market regulation modules, including a dissertation in finance.
- Equity analyst (University Trading and Investment Society), introduced to DCF models and fundamental analysis.

## CERTIFICATIONS

- FreeCodeCamp Full-Stack Developer - Responsive Web Design, JS Algorithms, Front-End Libraries, Data Visualization, Relational Databases, Data Analysis with Python, Quality Assurance.
- Microsoft Office Specialist (Excel, Word, PowerPoint).
- Thomson Reuters EIKON & DataStream

## LANGUAGES

- **English:** Native

- **French:** Fluent

- **Spanish:** A1 (Improving)
